New book examines innovative systems and new approaches

---

## Urban Transport XVI: Urban Transport and the Environment in the 21st Century

WIT Press has announced the publication of the papers presented at the 16th International Conference on Urban Transport and the Environment held in Limassol, Cyprus, May 5-7, 2010. The papers are available in a print volume, as an e-book, or via individual download from the WIT e-library. The book is entitled *Urban Transport XVI: Urban Transport and the Environment in the 21st Century*.

The continuing requirement for better urban transport systems in general, and the need for a healthier environment, has contributed to the continuing success of this annual

---

WIT Press is a major publisher of engineering and scientific research. The company prides itself on providing the latest advances from leading researchers and scientists, enabling readers to remain at the forefront of scientific developments.

meeting, which began in 1995 and attracts delegates from many different countries. This conference meets the need to thoroughly test and critically evaluate innovative systems, new approaches and original ideas before implementation. In keeping with growing security concerns, the current volume includes coverage of evacuation plans and system security.
