

The Transport Studies Unit at the School of Geography and the Environment in Oxford is currently advertising two postdoc positions, both with a closing date of 16 May 2018 (noon).

Research Associate in Innovation and Mobility

This post is focused on innovations in everyday mobility and will be part of a study using mixed methods (questionnaire, interviews) to evaluate experiences with vehicle-to-grid technologies for electric vehicle fleets. More information is available at https://www.recruit.ox.ac.uk/pls/hrsliverecruit/erq_jobspec_version_4.jobspec?p_id=134054.

Research Associate in Urban Mobility

This post is part of the [PEAK Urban](#) programme and will examine on the interactions between big data and transport planning and governance processes in rapidly growing cities in Africa, Asia and/or Latin America. The research will explore, among other things, the effects that smart city/mobility discourses and new data and analysis techniques have on urban transport planning and governance practices on the ground. More information is available on https://www.recruit.ox.ac.uk/pls/hrsliverecruit/erq_jobspec_version_4.jobspec?p_id=134055.

Informal inquiries about both posts can be directed to tim.schwanen@ouce.ox.ac.uk.

Dr Tim Schwanen

Director of the [Transport Studies Unit](#)

Associate Professor in Transport Studies

Fellow of St Anne's College

School of Geography and the Environment

University of Oxford

South Parks Road, Oxford
