[CALL TO CONTEST: innovative proposals for the prevention and reduction of everyday and episodic risks in Barrios Altos, Historic Centre of Lima, District Cercado de Lima](#)

by [Teresa Belkow](#)

This call falls within the framework of the project cLIMA sin Riesgo (February 2015 - November 2016), which is made possible with the support of the Climate Alliance and Development (CDKN). The project examines why urban risk traps are generated and how they impact the lives of people and threaten those mitigation and risk management investments made by citizens and public entities - with the aim of promoting concerted and co-designed actions together with public and private actors, to interrupt the cycles of risk accumulation and prevent their impacts. Moreover, this call to participate in the contest, becomes a contribution and strengthens the initiative of the "Observatory of the Historic Centre of Lima" which became official with the signing of a letter of intent between the DPU-UCL, CIDAP, MINCU and UNESCO with the objective to continue contributing collectively to the Historic Centre of Lima and for it to remain as a "living center".

(see Newsletters: <http://bit.ly/2b4oNgr>).

ORGANISERS:

Development Planning Unit, University College London (DPU-UCL)

Centro de Investigación, Documentación y Asesoría Poblacional (CIDAP)

CALL AND CONDITIONS:
