

Caros,

Este ano eu e mais dois colegas publicamos um livro que mostra paralelos sobre a urbanização contemporânea em países do Norte e do Sul global. Como o livro é caro, informo o link (<https://www.springer.com/gb/book/9783319578156>) para que vocês possam conferir o sumário e a preview oferecida pela Springer. Quem desejar conhecer mais sobre o trabalho por favor entre em contato. Abaixo texto de apresentação e sumário.

Atenciosamente,

"This edited collection critically discusses the relevance of, and the potential for identifying conceptual common ground between dominant urban theory projects – namely Neo-Marxian accounts on planetary urbanization and alternative 'Southern' post-colonial and post-structuralist projects. Its main objective is to combine different urban knowledge to support and inspire an integrative research approach and a conceptual vocabulary which allows understanding the complex characteristics of diverse emerging urban spaces.

Drawing on in-depth case study material from across the world, the different chapters in this volume disentangle planetary urbanization and apply it as a research framework to the context-specific challenges faced by many 'ordinary' urban settings. In addition, through their focus on both Northern- and Southern urban spaces, this edited collection creates a truly global perspective on crucial practice-relevant topics such as the co-production of urban spaces, the 'right to diversity' and the 'right to the urban' in particular local settings".
