

LEE KUAN YEW WORLD CITY ○ PRIZE

November / December 2017 | Special feature on the challenges of smart cities

Tackling cybercrimes in smart cities

With the rise of smart cities and increasing integration of technology into urban infrastructure and everyday life, the security vulnerabilities posed by the same technologies likewise grow, especially as cybercrimes evolve to become more sophisticated and complex.

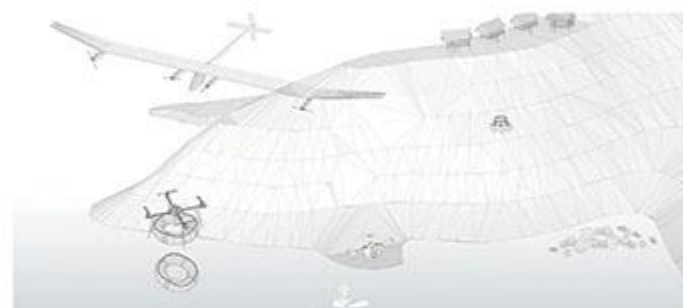

Cities, as centres of resources, critical infrastructure and services and information, are particularly attractive targets and hosts for cybercrimes. To effectively tackle such crimes in this age, cities need to embrace new mind-sets and strategies.

In this issue, we investigate what smart cities can do to make themselves less vulnerable to cybercrimes.

Interview: Anthony Townsend on the smart city

Forecaster and urban planner Anthony Townsend has been writing, speaking and consulting on urbanisation, ubiquitous computing, technology-led innovation and economic development for many years.

Highlights from the archives:

Smart cities, smart citizens

Smart cities are as much about people and citizen empowerment as they are about hardware and innovation.
