VITRUVIO- International Journal of Architectural Technology and Sustainability. Vol. 3 num.1-2 (2018)

On Spatial Analysis, Historical Buildings and Structures. Papers should develop, demonstrate and document strategies, approaches and solutions to re-activate and re-generate historic urban areas and/or cultural landscapes.

- TRANSFORMING EUROPEAN HISTORIC URBAN AREAS AND CULTURAL LANDSCAPES

Papers submitted under this topic should address questions regarding national policies on historic urban areas preservation, rehabilitation, adaptive reuse, maintenance, sustainability issues, such as energy efficiency, town planning and landscape management. Approaches may consider the building, district, town or landscape. Approaches to management principles and standards that inform surveying, inventory, cases studies and historic urban areas monitorisation are welcome.

- PRESERVATION OF HISTORICAL BUILDINGS, STRUCTURES AND MATERIALS

Papers submitted under this topic should address questions regarding historic buildings reuse, maintenance, and rehabilitation. Approaches to historic buildings preservation may consider the whole building or structure, as well as materials conservation and repair and surveying, among others. Approaches considering sustainable key aspects, such as energy efficiency in historical buildings are also welcomed.

Consequently, we seek contributions that inform new and tested blueprints for the socially and economically viable regeneration of European historic urban areas and cultural landscapes, with enhanced well-being and quality of life, social cohesion and integration.

Submission:

<https://polipapers.upv.es/index.php/vitruvio/about/submissions#onlineSubmissions>

Deadline for submission of papers : May 1, 2018

Indexation: VITRUVIO is currently indexed in the CSIC database ISOC, in the Matrix for the Analysis of Journals from the Universitat de Barcelona MIAR, in the ProQuest Index ULRICHWEB, in the Directory of Open Access Journals DOAJ and in the European Reference Index for the Humanities and Social Sciences ERIHPLUS.

Next indexations: VITRUVIO is about to be indexed in the Avery Index to Architectural Periodicals in 2018. The journal is also seeking indexation in the database of the Catalan scientific and university system Carhus Plus+, in the index of the Universidad de Granada C.I.R.C. Ec3metrics, in Sherpa Romeo, Google Scholar Citations and Emerging Sources Citation Index. In a near future the journal will be indexed as well in the Web of Science and Scopus.
