

Ulster University - Belfast School of Architecture and the Built Environment

We are offering exciting scholarship opportunities for PhD research in the area of planning.

Postgraduate researchers play a vital role in our innovative and world leading research activities within the Belfast School of Architecture and the Built Environment at Ulster University.

Further information is available at [www.ulster.ac.uk/phdcomp](http://www.ulster.ac.uk/phdcomp) (Select the Architecture, Built Environment and Planning tab). Current projects in the area of planning include:

- Healthy Urban Environments. Assessing the needs and expectations of Young People across European Cities (Professor Martin Haran)
- Planning for Community Resilience: bridging the policy-practice gap (Dr Linda McElduff)
- Co-Designing Child Friendly places: Growing the Resilience of Children through Inclusive Planning (Dr Gavan Rafferty)
- Exploring how planning can facilitate the transition to socially acceptable renewable energy infrastructure development on the island of Ireland (Dr Heather Ritchie)
- Communicating the built environment: testing assumptions of how experts and non-experts process development visualisations in consultation processes (Dr Neale Blair)
- Urban universities as catalysts for public-private regeneration strategies to benefit more liveable and healthy inner-city communities (Dr Saul Golden)

The deadline for applications is Friday 7th February 2020. For further details please contact Dr Karen Davison ([k.davison@ulster.ac.uk](mailto:k.davison@ulster.ac.uk)).
