

As the Director of the Designing Resilience in Asia Programme we have launched the Designing Resilience International Open Competition.

The competition aims to attract designers, architects, planners, urban designers, landscape architects, engineers, etc from all over the world to contribute to the discussion of Resilience and more specifically about Water Management Solutions. Any project done in studios or thesis related to the topic can be submitted since it is a site-less competition.

Hereby attached you'll find the information about the competition and we will really appreciate your help and collaboration in disseminating it among your students and colleagues.

Please let me know if you need any further clarification and thanks in advance for helping us to distribute and increase the impact of the competition.

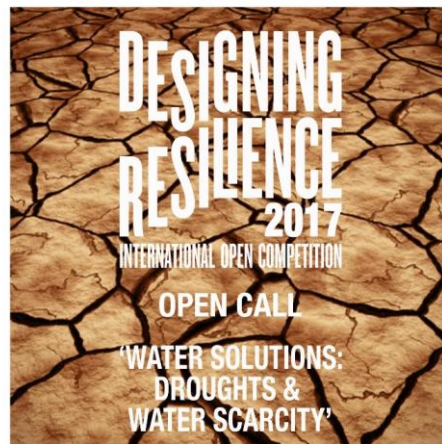

Best regards,
Oscar Carracedo

Organized & presented by:
NUS School of Design & Environment

Designing Resilience International Open Competition

In the DRIA, we view 'RESILIENCE' as a model for anticipating, preventing and preparing for the effects of climate change.

The inaugural 2017 DRIA International Open Competition organised by the School of Design and Environment, National University of Singapore, encourages participants to propose innovative **WATER SOLUTIONS** at the **urban planning, urban design, architecture, building technology or the industrial design scales** to tackle the challenge of '**DROUGHTS & WATER SCARCITY**' in our cities, neighborhoods and communities.

- Registration & Submission [starts](#) on **17 April 2017**
- Registration & Submission [closes](#) on **17 July 2017**
- Submission: 1x AO-sized panel, written report & team biographies
- Cash Prize: 1st Prize SGD2,500, 2nd Prize SGD 1,500, 3rd Prize SGD 1,000 (Singapore dollars)

- 14 international jury members

We invite your organisation to submit proposals and ideas! Do share with everyone who would be interested in promoting the [mission of the DRIA](#). No professional qualifications necessary. Thank you!
