

Handbook on Trade and Environment

Edited by [Kevin P. Gallagher](#)

Edward Elgar, 2009

Just as policy-makers in the United States are evaluating how to fulfill President Barack Obama's pledge to evaluate the environmental impacts of the North American Free Trade Agreement, and policy-makers and scholars worldwide are looking to mitigate the effects of global climate change in a manner that does not disrupt the global economy, GDAE has published a comprehensive handbook on international trade and the environment.

The Handbook on Trade and Environment has been edited by GDAE Senior Researcher and Boston University professor Kevin P. Gallagher. It includes chapters by GDAE researchers and affiliates Timothy A. Wise, Lyuba Zarsky, Frank Ackerman, and Alejandro Nadal. The volume will serve as a guide for scholars new to the field as well as students and policy-makers needing a quick reference to the research on the interface between trade and environment.
