

## Lecturer Quantitative Health Geography, GIS, Transport, Urban Development

We invite applications for a 4 year fixed term Lecturer position in Geography to teach into areas related to some combination of quantitative health geography, GIS, transport and urban development. You will be encouraged to develop a strong, externally-funded research programme and be expected to collaborate with other academics in the Department. The appointee will also be expected to develop links with and contribute to the wider science profession at local, national and international levels.
