

Dear all,

I'm pleased to let you know that we're recruiting a research assistant to work with us on an exciting new project on active travel in Greater Manchester.

The new researcher will work as part of our Healthy Active Cities team at University of Salford and in collaboration with Transport for Greater Manchester. The research will focus on understanding experiences with and attitudes towards active travel in communities in the area and will inform the development of TfGM's ambitious Made to Move plans.

More details and the application form are available at www.bit.ly/HACJob<<http://www.bit.ly/HACJob>> The deadline is 25th March. Happy to discuss further.

Best wishes

Graeme
