

Dear all,

With apologies for cross-postings... Applications are invited for our international and interdisciplinary joint Masters programme in **Nordic Urban Planning Studies**, which launched earlier this year. Could you please draw this to the attention of any potentially interested students?

This is a unique opportunity to study for a two-year degree at the universities of Roskilde (Denmark), Malmö (Sweden) and UiT The Arctic University of Norway, starting from September 2020. Taught in English by prominent researchers in the field, the programme addresses Nordic urban planning and development in a global context, exploring distinctive perspectives on urban sustainability, mobility, liveability, welfare, citizen empowerment and more.

Core training across the three universities is combined with opportunities to specialise at each. Emphasis is given to equipping students to deal with real-life problems and challenges, including through group and individual research projects. By moving between three universities and countries, including through attending a field course on Arctic cities based at Tromsø, participants will become skilled at working collaboratively and imaginatively with diverse communities, organisations, companies and municipalities.

Programme information is here: www.ruc.dk/en/nups. The application deadline for EU/EEA and Swiss students, for whom tuition is free, is 1 March 2020. The deadline for non-EU/EEA students is 15 January, except for those exempt from paying tuition fees for whom it is also 1 March (for further information, see the link for admissions). Applications open one month before the deadlines.

We also have one **tuition fee waiver and scholarship** available to international (non-EU/EEA) applicants to this programme, which will cover all tuition fees in addition to providing a scholarship of 7,800 Danish kr per month (designed to cover living expenses). Further details are available via the link for programme admissions.

With best wishes,

David
