By 2050, two-thirds of the planet's population will live in urban centers, and nearly 90 percent of the 2.5 billion new urban dwellers will live in Africa and Asia. The world's urban areas were responsible for around 70 percent of greenhouse gas (GHG) emissions in 2013, and that number could grow by 50 percent by 2050 if current trends continue. In 2015, world leaders committed to limiting the global temperature increase to well below 2 degrees

Centigrade and to pursuing efforts to reach a 1.5 degrees Centigrade limit in the context of the Paris Agreement under the United Nations Framework Convention on Climate Change (UNFCCC).

Events

[World Cities Day](#)

(October 31st, 2018)

World Cities Day aims to promote the international community's interest in global urbanization, enhance cooperation among countries and cities in meeting opportunities and addressing challenges of urbanization, and contribute to sustainable urban development. The overall World Cities Day theme is Better City, Better Life and this year's particular theme is Building Sustainable and Resilient Cities. The main event will be celebrated in Liverpool, UK.
