Measuring Individuals' Rights to Land

An Integrated Approach to Data Collection for
SDG Indicators 1.4.2 and 5.a.1

Measuring Individuals' Rights to Land

Land is a key economic resource inextricably linked to access to, use of and control over other economic and productive resources. Recognition of this, and the increasing stress on land from the world's growing population and changing climate, has driven demand for strengthening tenure security for all. This has created the need for a core set of land indicators that have national application and global comparability, which culminated in the inclusion of indicators 1.4.2 and 5.a.1 in the Sustainable Development Goals (SDGs) agenda. Having indicators on land ownership and rights in the SDG framework is an opportunity to routinely generate comparable, sex-disaggregated data to support evidence-based decision making on responsible land governance for sustainable development. The custodians of SDG indicators 1.4.2 (UN-Habitat and the World Bank) and 5.a.1 (FAO) have joined forces to develop a standardized and succinct survey instrument designed to collect the essential data for computation of both indicators simultaneously. As the data collection

requirements for each.[read more](#)

Events

Catalyzing Sustainable Urban Futures

(16th to 20th September 2019)

This global conference will be held September 16–20 in São Paulo, Brazil. Government leaders, city practitioners, and global experts will convene over five days to explore how they can work together to plan,

finance, and implement sustainable development trajectories for our cities. Three key urban development partners—the World Bank’s Global Platform for Sustainable Cities (GPSC), Brazil’s Sustainable Cities Program (SCP), and the host city of São Paulo—are collaborating to organize the conference. The event will jointly be GPSC’s 3rd Global Meeting and SCP’s 2nd International Conference on Sustainable Cities.
